Voluntary Declaration of Factory Production Control for the attestation of conformity system 3

Applicable to the following products:

Aluminium windows and doors produced with the AluK profile system

produced by the manufacturer

Pauwels NV

is submitted by the manufacturer to the initial type-testing of the product and a factory production control and that Kiwa Belgium NV has performed the initial inspection of the factory and of the factory production control and performs the continuous surveillance of the factory production control.

This declaration attests that all provisions concerning the attestation of factory production control described in Annexes ZA of the standards

EN 14351-1+A1

were applied, on a voluntary basis, as if a higher AoC system were in effect instead of the actual AoC system 3. This declaration was first issued on 15 January 2011 and remains valid as long as the conditions laid down in the harmonized technical specification in reference, or the manufacturing conditions in the factory, or the FPC itself are not modified significantly.

On the basis of this document the manufacturer is allowed to use the Kiwa FPC Label on his correspondence as shown on this page.
